

Course/Prefix Codes that Qualify for Phi Beta Kappa Spread

There are five major disciplines of study in CLAS for purposes of determining the PBK spread total, as indicated below. The analytic used by Curriculum office determines the number of hours earned (with C or better) in each of the five categories and reports those data for each student qualified for PBK by GPA for that term. The PBK Chapter's algorithm sums the total number of hours earned with a cap of 14 hours in any one discipline, then subtracts 14 hours to reflect the maximum from your "home" discipline.

As of Fall 2024, the minimum Spread count for election is **39 hours**. Note that AP hours and transfer hours are treated as other courses taken at UF. These "external" courses usually are assigned corresponding UF course prefixes or full designators on your transcript, so inclusion in the Spread analysis is typically automatic.
